3                    (ii) TREATMENT OF PLAN DISTRIBUTIONS.—If a distribution to an individual  
4                    would (without regard to clause (i)) be a  
5                    qualified 2016 disaster distribution, a plan  
6                    shall not be treated as violating any re-  
7                    quirement of this title merely because the  
8                    plan treats such distribution as a qualified  
9                    2016 disaster distribution, unless the ag-  
10                    gregate amount of such distributions from  
11                    all plans maintained by the employer (and

20                   2016 disaster distribution from an eligible  
21                   retirement plan other than an individual  
22                   retirement plan, then the taxpayer shall, to  
23                   the extent of the amount of the contribu-  
24                   tion, be treated as having received the  
25                   qualified 2016 disaster distribution in an

1 eligible rollover distribution (as defined in  
2 section 402(c)(4) of the Internal Revenue  
3 Code of 1986) and as having transferred  
4 the amount to the eligible retirement plan  
5 in a direct trustee to trustee transfer with-  
6 in 60 days of the distribution.

7 (iii) TREATMENT OF REPAYMENTS  
8 FOR DISTRIBUTIONS FROM IRAS.—For  
9 purposes of the Internal Revenue Code of

17 2016 disaster distribution shall be treated  
18 as a distribution described in section  
19 408(d)(3) of such Code and as having been  
20 transferred to the eligible retirement plan  
21 in a direct trustee to trustee transfer with-

20 OD.—The average rate assumption method is  
21 the method under which the excess in the re-  
22 serve for deferred taxes is reduced over the re-  
23 maining lives of the property as used in its reg-  
24 ulated books of account which gave rise to the  
25 reserve for deferred taxes. Under such method,

1 during the time period in which the timing dif-  
2 ferences for the property reverse, the amount of  
3 the adjustment to the reserve for the deferred  
4 taxes is calculated by multiplying—

5 (i) the ratio of the aggregate deferred  
6 taxes for the property to the aggregate  
7 timing differences for the property as of  
8 the beginning of the period in question, by

9 (ii) the amount of the timing dif-  
10 ferences which reverse during such period.

11 (C) ALTERNATIVE METHOD.—The “alter-  
12 native method” is the method in which the tax-

14 (i) computes the excess tax reserve on  
15 all public utility property included in the  
16 plant account on the basis of the weighted  
17 average life or composite rate used to com-  
18 pute depreciation for regulatory purposes,  
19 and

20 (ii) reduces the excess tax reserve rat-  
21 ably over the remaining regulatory life of  
22 the property.

23 (4) TAX INCREASED FOR NORMALIZATION VIO-  
24 LATION.—If, for any taxable year ending after the  
25 date of the enactment of this Act, the taxpayer does

2 the corporate rate reductions provided in the amend-  
3 ments made by this section—

4 (A) the taxpayer's tax for the taxable year  
5 shall be increased by the amount by which it re-  
6 duces its excess tax reserve more rapidly than  
7 permitted under a normalization method of ac-  
8 counting, and

9 (B) such taxpayer shall not be treated as  
10 using a normalization method of accounting for  
11 purposes of subsections (f)(2) and (i)(9)(C) of  
12 section 168 of the Internal Revenue Code of
