## Notes:

**Maximum compensation:** *Many plans determine compensation for benefit accruals and allocations based on the plan year. These plans must use the annual compensation limit in effect for the calendar year in which the plan year begins. Some plans use a separate 12-consecutive-month period (or sometimes multiple 12-month periods), instead of the plan year. In that case, for each 12-month period used, the plan would apply the limit in effect for each calendar in year in which each 12-month period begins.*

**Lookback year:** *Highly compensated employees (“HCEs”) are determined based on their compensation in a “lookback year.” For a 2022 calendar year plan, HCE status will be based on whether the employee’s 2021 compensation exceeded the 2021 amount of \$130,000. For fiscal year plans, the “lookback year” will either be the previous plan year or, if elected on a consistent basis for all of an employer’s plans, the calendar year ending in the current plan year.*

**Key employees.** *In addition to 5% owners, and 1% owners earning \$150,000 or more, officers earning more than an indexed amount are key employees. **Key employee balances as of the last day of a previous plan year are considered**, with certain distributions, in determining a plan’s top heavy status for a current year.*

A chart with these and other limits, going back to 1989 in some cases, is available at [this link](#).
